Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-6, drawn to a centrifugal rotating power element comprising a

motor and a driving shaft, classified in class 601, subclass 67.

II. Claims 7-11, drawn to a massaging device comprising a mask body,

classified in class 601, subclass 79.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a

single combination. The subcombinations are distinct from each other if they are shown

to be separately usable. In the instant case, invention I (a centrifugal rotating power

element) has separate utility that it can be used as massaging power element in various

massaging device such as massaging chair, bed, cushion, foot pad, etc.., and invention

II has separate utility such as a massaging mask that it can be used without having all

the features required by the invention I. See MPEP § 806.05(d).

2. Applicant is advised that the reply to this requirement to be complete must

include an election of the invention to be examined even though the requirement is

traversed (37 CFR 1.143).
